

CUSTOMIZED SOLUTIONS

With technical outages occurring weekly, Mansfield Oil's business technology team needed to rethink the overall strategic goals of their self-owned data center.

Migrating To a Better Data Center Solution.

CHALLENGE

With a need for stabilized uptime and increased resiliency, they were looking for secure, reliable data center solutions, which led them to QTS Suwanee's custom data center services.

DATA SOLVED

Mansfield Oil transitioned its data center solely to the QTS Suwanee facility in 2014. In less than two months, QTS helped Mansfield Oil reshape and stabilize its core infrastructure platforms, supporting network carrier transitions, hardware reconfigurations, upgrades and more. Over the course of a weekend, Mansfield staff and QTS coordinated the migration and set up of Mansfield's entire data center at the QTS facility to ensure that critical systems were fully functioning on the following Monday.

In addition to moving servers, storage hardware, racks and cables, Mansfield Oil also migrated its IT Infrastructure team to the QTS facility, where they now benefit from QTS' industry-leading physical and logical security measures, and direct exposure to QTS data center operations experts.

RESULTS

Today, QTS is providing a state-of-the-art backbone for Mansfield Oil where always-on and disaster recovery protect their critical IT infrastructure. Even with new systems added to Mansfield Oil's platform, company uptime has increased significantly, with zero outages experienced since the data center migration.

QTS' unmatched level of security, 24x7x365 monitoring and data center operations expertise make it possible for Mansfield Oil to rapidly expand as its business continues to grow. The transition to QTS has allowed the company to reshape their business and be more productive by reducing costs and saving money. The team is currently planning its next phase of relocating all production systems to QTS Suwanee.

INTEGRATED PRODUCTS AND SERVICES

Instead of expending resources and capital expenses to build and operate a data center on your own, leverage our investments, infrastructure, experience and expertise.

REDUCE capital expenditures
