CONNECTIVITY SERVICES
InternetCONNECT

## *Experience High Performance Internet Connectivity*

What is the cost of Internet downtime? For businesses based on high-level data transactions, losses may be calculated in millions of dollars per minute. When you add on top of that loss of productivity, regulatory compliance exposure and the damage to your brand reputation, the cost of downtime is much more than just financial.

For enterprises and government agencies conducting business over the Internet, QTS InternetConnect service provides a highly reliable, secure connectivity solution for productionfocused environments. QTS internetConnect is purposely designed with diversity and redundancy and offers dedicated with burstable bandwidth options that provides resiliency and flexibility you need to support your business.

QTS internetConnect

Having two to three ISP backbone providers with fully redundant connections to your environment gives you unmatched reliability and guarantees maximum uptime.

■ Dual connections from your environment
■ Diverse, redundant paths to multiple backbone providers
■ Dual paths, with diverse entry points into the QTS Data Center

BENEFITS

Direct access to multiple ISP backbones offers unmatched reliability and guarantees maximum uptime

Optional Anti-DDoS Mitigation Services provide an additional level of protection and security

Dedicated and burstable bandwidth options for greater flexibility and resiliency

24x7x365 visibility and premium support

Backed by an industry leading 100% SLA

DUAL CONNECTIONS   **DIVERSE REDUNDANT PATHS**

CUSTOMER ENVIRONMENT   **QTS ACCESS POINT**   **BACKBONE PROVIDERS**

BACKBONE PROVIDERS   **QTS DATA CENTER**   **BACKBONE PROVIDERS**

MORE THAN DATA SOLUTIONS. DATA SOLVED.

QTS internetConnect Advantages

■ **Multi-carrier network**
A minimum of two Internet backbone providers improves availability and reliability.

■ **Flexible bandwidth**
Dedicated circuits help to achieve low latency with speeds of 10Mbps, 100Mbps or 1Gbps. Additional bandwidth is available in 1 Mbps increments and allows for greater flexibility.

■ **Improved protection and security**
Anti-DDoS Mitigation Services* provide an additional level of security, minimizing impact from DDoS attacks and maintaining network availability.

■ **More efficient routing**
By supporting both IPV4 and IPV6 Internet Protocols and Border Gateway Protocol (BGP), you will experience more efficient routing and improved load sharing.

■ **24x7x365 visibility and premium support**
Rely on 24 hour monitoring and access to the QTS Customer Portal for real-time visibility into the performance of your Internet connections. We monitor your environment and provide support from data center experts in the QTS Operations Service Center (OSC).
