

QTS CLOUDRAMP®

aws marketplace

Cloud-Ready Colocation, Available On-Demand.
Dedicated colocation for workloads not yet ready for public cloud.

Designed in collaboration with AWS, QTS CloudRamp® is a pre-built colocation solution that has been preconfigured for AWS Direct Connect in advance, allowing you to access workloads from both environments simultaneously. A fully integrated solution with month-to-month terms that can be deployed in days! Available exclusively on the AWS Marketplace.

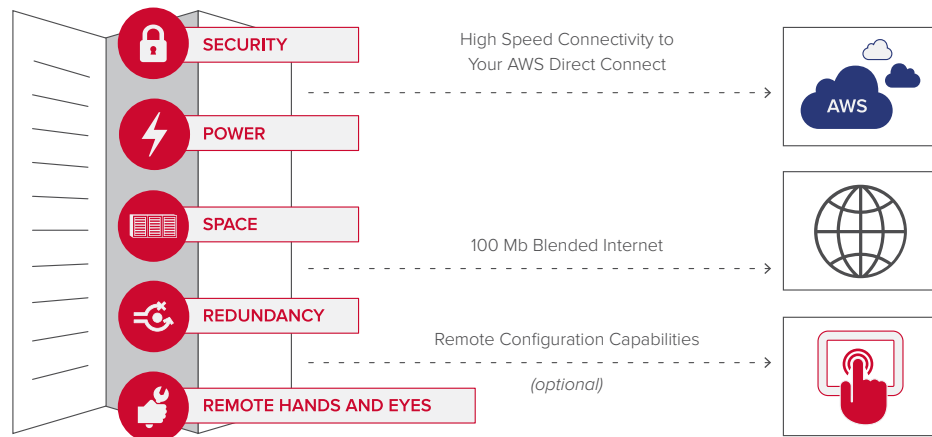

QTS CloudRamp® includes:

- Secure, prebuilt cabinet with power and redundancy
- Pre-configured connectivity to AWS Direct Connect
- 100 MB of blended internet service
- Rack & Stack Service – installation of your hardware
- Monthly services hours
- 24 x 7 x 365 support based in the U.S.
- Access to the QTS Customer Portal
- Optional remote configuration devices

Use Cases

- Short-term cloud migration, DevOps and Proof-of-Concept projects
- Latency sensitive workloads that require data center proximity
- Long-term hybrid workloads that require dedicated infrastructure
- Compliant workloads
- Hardware dependent applications
- Data center consolidation/modernization

One Fully Integrated Solution. One Provider. One Invoice.

Data Center Compliance

Three Tiers to Fit Your Business Needs

QTS CloudRamp® offers three tiers with varying levels of service and remote configuration options, depending upon the level of visibility and control you require for your deployment. Each tier is available with connectivity and without connectivity. Each order must include at least one connected cabinet.
