

QTS CloudRamp™

Cloud-Ready Colocation, On-Demand

What is Cloud-Ready Colocation from QTS CloudRamp™?

Exclusively available on the AWS Marketplace, this secure, compliant and dedicated colocation solution is optimized for hybrid cloud workloads and public cloud migrations. With no annual contract, this move-in ready solution can support your short-term workloads with immediate capacity and high-speed direct connectivity to AWS with month-to-month billing.

Easy 3-Step Process for AWS Customers

This revolutionary purchasing process is automated, on-demand and allows you to speed your cloud migration.

ORDER ONBOARD PROVISION

Through 2020, over 85% of enterprises

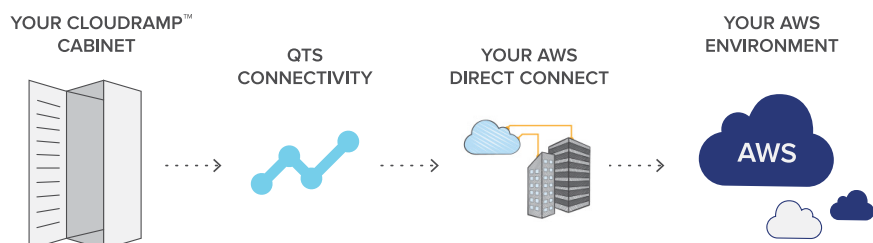

adopting a cloud-first strategy will continue to host business-critical applications in traditional data center environments.

- Gartner, Innovation Insight for Data Center Colocation Report, 4 May 2017

Immediately Available At:

- QTS Chicago
- QTS Piscataway
- QTS Richmond
- QTS Santa Clara

AWS Connectivity: Prebuilt and Preconfigured

QTS has already preconfigured your data hall with AWS Direct Connect, so once your hardware is installed in your colocation space, you can quickly connect to AWS services and resources. This gives you full access to your entire AWS infrastructure via your AWS Direct Connect service.

QTS AWS Experience and Expertise

- Strategic Partnership with AWS to deliver AWS-Connected Colocation
- Advanced Partner Network (APN) Consulting Partner
- AWS Direct Connect Provider
- +250 AWS certifications and accreditations with industry-leading 99.999% uptime guarantee
