

QTS GRONINGEN

One of the largest mega data centers in the Northern Netherlands, QTS Groningen is designed to meet the needs of large Hyperscale and Enterprise companies. QTS Groningen further expands QTS' international footprint in and has the capacity to support continued expansion in the region.

Building Specifications

- 45,000 sq. ft. of white space
- Immediate capacity available

Power

- 10MW utility power (2N)
- 4.8MW total critical power capacity dependent on configuration
- Configuration options: N, 2N N+1
- 14 static UPS units and 7 generators provide minimum 24 hour backup coverage

Cooling

- Water connection of 25 m3/hr (with back-up supply for at least 24 hours)
- 3 centrifugal chillers
- 72 cooling units
- Fully automated building management system providing control, monitoring and alarm of critical building functions
- Water-side economizers provide free cooling during low temperature ambient conditions

Connectivity

On Net Carriers

- | | | |
|-------------------|-----------------------|----------------------------|
| • KPN, | • CNG | • NLIX |
| • Eurofiber | • Relined | • Cooperatie Noord Drenthe |
| • Vodafone Ziggo, | • RNET | • NG Networks |
| • Tele2 | • Tata Communications | |

Security

- Security guards on-site 24x7x365
- Closed circuit video cameras provide extensive coverage of interior and exterior building areas
