## MANAGED AZURE ESSENTIAL

### OPTIMIZE YOUR AZURE ENVIRONMENT WITH EASE

As your Azure environment becomes more complex, the effort needed to optimize spend, security, and compliance can be a challenge.

QTS Managed Azure Essential service simplifies cloud infrastructure management by providing best-in-class tools to automate the monitoring and enforcement of best practices 24×7×365. We give you insights into security and compliance so you can be audit-ready for 35 regulatory standards.

The QTS Service Delivery Platform (SDP) enables a unified view of your Public Cloud and QTS Hosted Private Cloud environments. Our Hybrid Cloud Manager uses cloud native APIs to collect and serve actionable data for reporting, alerting, analyzing, and automating your cloud environment.

We harvest your current Azure environment and provide insights to ensure your environment is configured as efficiently as possible. We help you begin eliminating waste in your cloud infrastructure on day one.

#### Essential Service

- Full access to cloud usage and spending optimization tools
- Microsoft Advanced Support
- Consolidated billing
- Automated alerts
- 24×7×365 monitoring and phone support

#### A la Carte

- Consultation
- Migration services
- Private connectivity to ExpressRoute

## Benefits

- **Reduce Cost Overruns:** Gain actionable insights – report, analyze, alert, and automate your cloud environment
- **Automation:** Set cloud automations ("Bots") continuously run against defined security, compliance, and cost savings thresholds to take automated corrective actions
- **High Touch Support:** Through our Operation Service Center (OSC) available 24x7x365
- **Reduce Shadow IT:** Analyze resource utilization to control your Azure IT spend
- **Security Best Practices:** Integrate 400+ best practice checks for cost, security, performance and availability
- **Enhanced Visibility:** Get metrics on availability, security, policy compliance, and cost management through our QTS Customer Portal
- **Consolidated Billing:** See your Azure usage alongside other QTS services in one bill
